- Physical, social, and environmental character
- Positive and focus on the future people and their quality of life

General Plan 2044

Discovering Golden Opportunities

People Vote with Their Feet

General Plan 2044
Discovering Golden Opportunities

Bend is a community valuing its natural features of trees, rocks, river, sounds, views and a diverse citizenry that works together creating a healthy legacy and vision for Bend's future livability.

The Bend Comprehensive Plan is designed to preserve and enhance this vision for our community

We Will Chicago's initial goals for future growth across Chicago are based on three core principles: equity, diversity and resiliency for all residents in every neighborhood

THE FOUR CORE PRINCIPLES OF MILWAUKEE

1. A strong and prosperous economy enhances the quality of life for Milwaukee residents.
2. A healthy environment is essential for the survival of all living things and the foundation for a thriving city.
3. A high quality of life depends on the equitable distribution of resources and opportunities to residents.
4. Meaningful engagement in the decision making process helps to ensure strong, vibrant, and desirable communities.
